

Job Description

JOB TITLE: Hydraulic Technician
DEPARTMENT: Assembly and Service
REPORTS TO: Assembly Supervisor
LOCATION: Hamilton Ontario

Birmingham Foundation Equipment (“Birmingham”), a division of Soletanche Bachy Canada (“SB Canada”), is a world leader in specialized deep foundation construction equipment. Our team works with customers to develop solutions to their unique job challenges. These solutions are brought to life using the latest 3D design software and manufactured in-house in our 50,000 sq. ft. manufacturing plant in Hamilton, ON.

We are currently seeking a skilled Hydraulic Technician to join our assembly department. The Hydraulic Technician will be the primary contact for customers experiencing hydraulic issues and will be responsible for the assembly, testing, and servicing of hydraulic systems. This role requires a detail-oriented professional with strong technical skills and the ability to collaborate effectively with engineering to drive improvements and reduce costs.

Key Responsibilities:

Customer Support:

- Serve as the primary contact for customers with hydraulic issues, providing technical support and troubleshooting assistance.
- Diagnose and resolve hydraulic system problems in a timely and efficient manner.
- Maintain records of customer interactions and solutions provided.

Hydraulic System Assembly:

- Assemble hydraulic systems and components according to engineering specifications and assembly instructions.
- Ensure all assembled systems meet quality standards and operational requirements.
- Conduct routine maintenance and repairs on hydraulic systems as needed.

Testing and Servicing:

- Perform comprehensive testing of hydraulic systems to ensure functionality and safety.
- Identify and address any issues or malfunctions during the testing phase.
- Document test results and maintain accurate service records.

Collaboration with Engineering:

- Work closely with the engineering team to identify areas for improvement in hydraulic systems.
- Provide feedback and suggestions to enhance system performance and reduce production costs.
- Participate in engineering design reviews and contribute technical expertise.

Process Improvement:

- Assist in developing and implementing process improvements to increase efficiency and reduce hydraulic system assembly and servicing costs.
- Stay up to date with industry trends and advancements in hydraulic technology.

Qualifications:**Education and Experience:**

- High school diploma or equivalent; technical degree or certification in hydraulics, mechanical engineering, or a related field is preferred.
- Minimum of 5 years of Experience working with hydraulic systems in an industrial or manufacturing setting.

Technical Skills:

- Proficiency in reading and interpreting engineering drawings and schematics.
- Strong knowledge of hydraulic system components, assembly processes, and testing procedures.
- Experience with hydraulic troubleshooting and repair techniques.

Soft Skills:

- Excellent problem-solving and analytical skills.
- Strong communication skills, both verbal and written.
- Ability to work independently and as part of a team.
- Attention to detail and a commitment to quality.

Physical Requirements:

- Ability to lift and move heavy components as needed.
- Comfortable working in a hands-on environment with exposure to hydraulic fluids and machinery.

Other Requirements:

- A valid Canadian passport is mandatory.
- Willingness to travel as required for the role.

By joining our team, you will become part of a growing team and have opportunities to build strong relationships with industry leaders worldwide. A competitive benefits package is just another reason why Berminghammer is a great place to work.
